

The complete RIP-based workflow with tools that prepare work faster and more accurately than any other system on the market.

**Better Printing. Bigger Profits.**

PrintFactory is a complete suite of RIP-based, wide format workflow tools that do make a difference and you can afford.

**“We’ve got consistent color, zero color drift, lower costs, greatly improved staff morale, and our output is up by 25%. That’s all directly linked to PrintFactory workflow software.”**

Sean Guegan, MD, Signtech

- › Consistent color printing on every printer, everywhere, every time.
- › Device-link profiles for better color, same quality but 20% + less ink.
- › Intelligent 'last minute' nesting that reduces media spend instantly.
- › Easy 3-step profile wizards and a best-in-class in-app editor.
- › The fastest, most-intelligent RIP on the market today.
- › Centralised control over all of your devices from one point.

- › Workflow software made by printers, for printers.
- › Supported by a technical team who understand your work.
- › Compatible with complex MacOS, Windows and Linux networks.
- › Works with more than 2,000 printers and cutters.
- › Pay monthly, pay annually, or buy as a one-off purchase.
- › Handles high-street print and lights-out, Industry 4.0 production.

Start making more money today. **PrintFactory** pays for itself with smart tools that save ink, media, and time, instantly.

***“With PrintFactory, there’s no time lost troubleshooting. And we’ve had fantastic feedback from our customers since we’ve introduced the software.”***

**Carla Rennings, Studio Dir. Artex**

# The Ideal 6-In-1 System

- ➔ Consistent color
- ➔ Lower ink costs
- ➔ Smarter job prep
- ➔ Less wasted media

- Centralised control
- Faster production
- Higher quality color
- Specialist ink tools
- Smart/manual layouts
- Color certification
- Reporting/dashboards
- Seamless API integration
- XML-driven
- Unlimited installs
- Cloud back-ups

Cloud-based workflow  
software that grows  
with your business.

## RIP

Centralised control over every printer and cutter, everywhere in your business. Unlimited installs.

The cloud-based PrintFactory RIP is XML-driven for a faster, more accurate, more productive workflow.

## Layout

The all-in-one tool. Every type of smart nesting you can imagine, with total manual control. Step-and-repeat, Double sides, Finishing tools, Contour management, Spot colour assignment and more.

## Editor

Make last minute corrections or major changes. This advanced pre-press tool has all the easy-to-use design features you need to amend almost any file, tile, template, and speed up your production.

## Calibrator

3-step wizards for device-link profiles that guarantee consistent color on every device, anywhere, all of the time. Save ink from day one with no loss in quality. Supporting most spectros. Proof certification.

## Printstation

Load balancing with confidence. A spooler that 'opens up' your printer's functionality and gives you a simple interface to get hands-on, preparing multiple jobs at the same time with consistent color guaranteed.

## Just In Time Tools

Make smart changes and manual adjustments to your jobs right up to the last second, without slowing down your production. Optimal nesting solutions mean less waste guaranteed.

## Automation

PrintFactory Automation is ideal for MIS/ERP / Industry 4.0 ready systems, lights-out production, and industrial-sized operations. Automation includes full integration with Web-2-Print, a deadline-centric workflow that includes dynamic job scheduling, bi-directional API integration, and unlimited scalability.

## Focus

PrintFactory Focus is our basic level plan. With ICC and device-link profiling included, you'll get the Editor, Calibrator, and Layout tools, plus support for roll-to-roll cutters and queue-based automation. Focus is ideal for smaller businesses such as signmakers or midweight large format printers.

## Production

PrintFactory Production is ideal for larger remote setups with multiple Editor installations, multiple printers and cutters, and (if you want them) multiple RIPs ~ all centrally controlled. Dashboard reporting. Scalable workflows. Production improves print quality and starts saving ink and media instantly.

Pricing for the drivers/devices you actually use. Annual plans, monthly plans, or one-off purchase ~ **You decide**

- ➔ The right tools
- ➔ The right team
- ➔ The right support
- ➔ The right price

Worldwide support  
from a team that  
works the same  
way you do.

## By printers, for printers.

- › 100% Independent
- › Global network
- › Specialist color expertise
- › Technical helpdesk
- › Industrial applications
- › Bi-directional api
- › Web-2-print integration
- › Mis / Erp connectivity
- › Industry 4.0 Compliant
- › Textile specialists

# By printers, for printers.

Do you want **consistent color**, everywhere, all of the time?

Do you need smarter **RIP-based workflow software** with tools that prepare work faster and more accurately?

Can you imagine a **production workflow that saves** time, media, ink, and money - every day?
